DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Namely,

- 1) the species of controlling and air fuel ratio in a furnace which drives a fan with a specified voltage, measures each cycle time of pulse signals generated during revolution of the fan motor, detects an RPM(Revolution Per Minute) of the fan motor according to the measured cycle time, and controls opening of a gas valve based on an average voltage of a PWM(Pulse Width Modulation) signal applied from a controller,
- 2) the species of controlling and air fuel ratio in a furnace according to a predetermined pulse signal in a state that an RPM per count value of each cycle of pulses is preset, counts each cycle of the pulse signals, detects the RPM by reading the RPM according to the pertinent count value among the preset RPMs, and controls a gas valve by an average voltage of a PWM signal applied from a controller, and
- 3) the species of controlling and air fuel ratio in a furnace according to a predetermined pulse signal, counts each cycle of the pulse signals, detects an RPM from the count value

✓ and a linear function of the RPM, and controls a gas valve with an average voltage of a PWM signal applied from a controller.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Inventorship Reminder

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
